

Stacking ordinary plastic cups can help build the developing brain of the infant/toddler.

Supplies

- ★ Plastic cups in graduating sizes

Note: It is very important not to use Styrofoam cups because of a choking hazard for young children.

Stacking Cups

Skills Children Learn: Cause and effect, Eye-hand coordination, Cognitive development, Language development

Directions

- ★ Model the act of stacking the cups while inviting the children to help you.
Youngsters will join in on the level they are able.

Tips For Mixed Ages: This activity can become as simple or as detailed as you want to make it. Children who are younger than toddler age will simply enjoy watching as you stack and tumble the cups.

For older children, you can create cups that can be sorted based on numbers, colors, size, etc.
